FOR IMMEDIATE RELEASE

ITT ENIDINE INC. BEGINS SERIES OF PLANT EXPANSIONS

November 22, 2017 – Orchard Park, NY. – ITT Enidine, a global leader in designing and manufacturing energy absorption, vibration isolation and attenuation products throughout the world has broken ground on the first in a series of planned plant expansion projects at its Orchard Park, NY facility. Concept Construction Corporation has been selected to perform the initial general construction work and has already begun installing the foundations for phase 1 of the project.

ITT Enidine Executive Director of Operations and Site Leader Christopher Lewandowski had this to say about the project. “The innovative ITT Enidine energy absorption solutions that we provide to solve our aerospace and industrial customer’s challenges and our operational efficiency due to lean manufacturing techniques has allowed us to grow significantly enough to require a building expansion. We are excited about the future and are proud of being able to grow manufacturing and employment here in the US and specifically in the Western New York area.”

The 1,300 sq. ft. addition and exterior renovation work includes a new covered fenced in, dumpster enclosure area, reworking of the exterior upper facade and a paneled membrane roof. The first phase of construction at the site started on November 1st 2017 and is expected to be completed by the end of January 2018.
