WHY:

As the economy recovers from the Covid-19 lockdown the labor market is presenting unique opportunities for both workers and employers.

The workers who are first to re-enter the job market will find career-enhancing job prospects that didn't exist just six months ago, as businesses are now rebuilding their organizations. Additionally, job seekers can be more confident than ever that employers who are staffing-up today are the strongest and most stable businesses going forward.

Companies who struggled to hire the talent they needed pre-Covid will find a labor pool that is consistent with the current high rate of unemployment. As the most desirable workers reenter the labor market employers will have a unique opportunity to build a team that is stronger than they had before the shutdown.

This window of opportunity may last just weeks or perhaps months as the most skilled workers and the strongest companies benefit from these truly unprecedented times.

The Express Employment Professionals office in West Seneca has nearly 100 manufacturing/light industrial jobs available at more than 25 employers throughout Cheektowaga, West Seneca, Lancaster and other communities south of Buffalo.

The positions available through Express Employment Professionals in West Seneca offer compensation matching the skills and experience of job seekers in work environments with opportunity for career advancement.

There is never a fee for those seeking new career opportunities through Express Employment Professionals, which invests the time to listen to your needs to find your best job match.
